KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

You are investing in an Exchange Traded Fund constituted as a unit trust in Singapore that seeks to provide a high level of income and moderate long-term capital appreciation by tracking, as closely as possible, before expenses, the performance of the Index.

The Index is designed to track the performance of 30 highest total dividend-paying REITs in the Asia Pacific Ex-Japan region subject to size, free-float market capitalisation and liquidity constraints. The Index will be reviewed semi-annually in March and September. The Index Provider is SGX Index Edge.

As the Fund invests into REITs, which typically pay most or all of their income as dividends to investors, the Manager expects the Fund to receive regular dividends from the REITs invested into and the Manager will in turn endeavour to declare semi-annual distributions in June and December each year. Payment of distributions, if any, will be made within 2 months of any declaration of distributions. However, investors should note that such distribution is not guaranteed and is subject to all times to the discretion of the Manager.

Refer to the “Phillip SGX APAC Dividend Leaders REIT ETF” section and Appendices I and II of the Prospectus for further information on the features of the product.

¹ The Prospectus is available for collection at the Manager’s office at 250 North Bridge Road, #06-00 Raffles City Tower, Singapore 179101, from Monday to Friday during usual business hours, or accessible at www.phillipfunds.com.

² There is currently no income reinvestment service for the Fund.

<p>The declaration and/or payment of distributions (whether out of income and/or capital) may have the effect of lowering the Net Asset Value of the Fund. Moreover, distributions out of capital may amount to a reduction of a Unitholder's original investment.</p> <p>Notwithstanding the foregoing provisions, in the event that the Fund is accorded tax transparency treatment by IRAS in respect of distributions received by the Fund from S-REITs out of specified income derived by the S-REITs, the Manager shall comply with the Tax Guide and distribute all distributions from S-REITs (net of expenses) derived by the Fund for any distribution period (not exceeding 6 months) to Unitholders by the next distribution period.</p> <p>The Units of the Fund are Excluded Investment Products (as defined under the Notice on the Sale of Investment Products, the Notice on Recommendations on Investment Products or the Securities and Futures (Capital Markets Products) Regulations 2018, as may be amended from time to time).</p>	
Investment Strategy	
<p>The Manager employs a “passive management” or indexing investment approach designed to track the performance of the Index. The Index is a fundamentally weighted index that comprises the 30 highest total dividend-paying REITs in the Asia Pacific Ex-Japan region subject to size, free-float market capitalisation and liquidity constraints. Index Securities are ranked and weighted in the Index based on total dividends, where total dividends refer to each Index Security's trailing 12-month dividends per share (in US\$) multiplied by the free-float number of outstanding shares.</p> <p>The Manager will seek to achieve the Fund's investment objective by investing all or substantially all of the Fund's assets in Index Securities in substantially the same weightings as reflected in the Index and aims to deliver an investment performance which closely corresponds to the performance of the Index. However, various circumstances may make it impossible or impracticable to purchase each component Index Security in such weightings. In those circumstances, the Manager may employ, alone or in combination with, other investment techniques in seeking to closely track the performance of the Index.</p> <p>In managing the Fund, the Manager may adopt either a Replication Strategy or a Representative Sampling Strategy.</p> <p><u>Replication Strategy</u></p> <p>Using a Replication Strategy, the Fund will invest in substantially all the Index Securities in substantially the same weightings (i.e. proportions) as the Index. However, if the Manager believes that a Replication Strategy is not the most efficient means to track the Index, the Manager may decide to adopt a Representative Sampling Strategy instead.</p> <p><u>Representative Sampling Strategy</u></p> <p>Using a Representative Sampling Strategy, the Fund will hold a representative sample of a portfolio of securities selected by the Manager using quantitative analytical models in a technique known as “portfolio sampling”. Where a representative sampling strategy is employed, securities that are not constituents of the Index may be held by the Fund. Such securities will be expected to have a high level of correlation or a similar valuation or market capitalisation as the relevant Index Securities.</p> <p>The Manager will seek to construct the portfolio of the Fund such that, in the aggregate, its capitalisation, industry and fundamental investment characteristics perform like those of the Index.</p>	<p>Refer to the “Investment Policy of the Fund” section of the Prospectus for further information on the investment policy of the Fund.</p>

KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to the "Risk Factors" section of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to Market Risk. <ul style="list-style-type: none"> ○ The price of Units and the income from them may go down as well as up. Investment in the Fund involves risks similar to those inherent in investing in REITs traded on an exchange, such as market fluctuations caused by factors like economic and political developments, changes in interest rates and foreign exchange. A significant decline in the value of the Index can therefore be expected to result in a similar decline in the Net Asset Value of the Units. • You are exposed to Foreign Exchange Risk. <ul style="list-style-type: none"> ○ As the Fund's investments are generally invested in securities in the Asia Pacific, a substantial portion of the revenue and income of the Fund may be received in a currency other than the Fund's base currency of US dollars, hence any fluctuation in the exchange rate of the US dollar relative to the relevant foreign currency will affect the Net Asset Value of the Fund. 	
Liquidity Risks	
<ul style="list-style-type: none"> • The secondary market may be illiquid. <ul style="list-style-type: none"> ○ You can sell your Units on the SGX-ST. However, you may not be able to find a buyer on the SGX-ST when you wish to sell your Units. While the Fund intends to appoint at least one market maker to assist in creating liquidity for investors, liquidity is not guaranteed and trading of Units on the SGX-ST may be suspended in certain situations. ○ If the Units are delisted from the SGX-ST or if the CDP is no longer able to act as the depository for the Units listed on the SGX-ST, the Fund may be terminated and Units will be redeemed in accordance with the termination provisions in the Trust Deed. • Redemption through Participating Dealers. <ul style="list-style-type: none"> ○ Investors can only redeem Units through Participating Dealers if they are clients of the relevant Participating Dealer, subject to such terms and conditions as may be imposed. A redemption application shall only be made or accepted in respect of Units constituting an application unit size of 50,000 Units (or such higher number of Units in multiples of 1,000 Units). Investors who do not hold an application unit size may only be able to realise the value of their Units by selling their Units on the SGX-ST. 	
Product-Specific Risks	
<ul style="list-style-type: none"> • You are exposed to risks of investing in REITs. <ul style="list-style-type: none"> ○ Investments in REITs are subject to risks similar to investing directly in real estate. For example, real estate values may fluctuate as a result of general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, regulatory limitations on rents, etc. ○ REITs may also be subject to financial covenants and/or borrowing/gearing ratios and their ability to comply with such ratios could be adversely affected if the REITs are unable to obtain funds from investors or loans or re-finance existing debt. ○ Some REITs may have limited diversification and may be subject to risks inherent in financing a limited number of properties. 	

- **You are exposed to Concentration Risk.**
 - The Index Securities is comprised of REITs in the Asia Pacific ex-Japan region and may be less diversified compared to a fund investing in REITs globally. To the extent that a property sector or a geographical region in which the Index Securities are concentrated in falls out of favour, the Fund's performance may be negatively affected.
- **You are exposed to Tracking Error Risk.**
 - Factors such as fees and expenses of the Fund, imperfect correlation between the Fund's assets and the Index Securities constituting the Index, rounding of REIT prices, changes to the Index and regulatory policies may affect the Manager's ability to achieve close correlation with the performance of the Index. The Fund's returns may therefore deviate from the Index and there is no assurance that the Fund will be able to fully track the performance of the Index.
- **The Fund is not actively managed.**
 - The Fund invests in the Index Securities included in the Index and is not actively managed. The Manager does not attempt to select REITs or stocks individually or to take defensive positions in declining markets.
