Manager's Investment Report

The investment objective of the Global Opportunities Fund is aimed to achieve medium to long-term capital appreciation. It is target at investors with a moderate risk appetite, with a balanced allocation of equities, commodities, REITs and bonds.

History seems to always repeat itself. Our last annual commentary briefly discuss on the issues of the US yield curve inversion and the high possibility of an impending recession which will followed through within the following 12-18 months. The same scenario happened almost 12 months before the collapse of the S&P 500 index back in September 2007 during the Global Financial Crisis. The global economy is now on the brink of collapse due to a world-wide shut down in economic activities to contain the spread of COVID-19. Every fire needs a spark and the same goes to every recession, which is either triggered by a financial implosion or a major dislocation in economic demand & supply matrix. The economic impact of COVID-19 is far more devastating than the 2009 Global Financial Crisis and most prominent economists concluded the world will sink into an unprecedented deep recession in the likes of the Great Depression since 1929.

If memory is still vivid in our minds, capital markets are still assessing the economic impacts as a result of US President Donald Trump's trade dispute with China in 2019. The year ended with major developed equity markets indices hitting all time high relative over the last decade, fuelled by hopes of a near term resolution for the US-China trade dispute and also the United States Federal Reserve accommodative monetary policy with three rate cuts in 2019. The fixed income market has always been a strong indicator of how the real economy will trend as the US 10 years treasury has started to decline since the end of 2019 from 1.9% to the lows of 0.52% in mid-March 2020. The equity bulls only started to awaken from their celebrative mode 2 months later, which see the S&P 500 index dipping almost 34% (the largest monthly decline since the 2009) within the month of March 2020. The degree of decline within a short span of time has spurred buying interest from contrarians which regarded this moment as one of the buying opportunities in the lifetime.

The Phillip Global Opportunity Fund declined 5.4% for the financial year ended 31 March 2020 and the performance is line with local peers with similar investment mandates. The fund's full year performance was dragged by melt-down in global capital markets during the month of March 2020. However on a nine-month basis, the fund actually gained more than 5% as at 31 December 2019.

In terms of asset allocation, the fund started the financial year with a 70%/30% (equity/fixed income) allocation and the equity segment was gradually shifted towards 50% mark by mid of the financial year in light of weak US economic data started to show up. US GDP growth slowed from 3.1% to 2% over the second quarter of 2019 and ISM Manufacturing PMI has fallen below the 50 mark since July 2019 and remain underwater till end of 2019. The deep discount in the developed equities market in March 2020 created an opportunity asset managers to rebalance their funds and likewise, the team risk on the asset allocation towards a 80%/20% (equity/fixed income) matrix for Phillip Global Opportunity Fund. The manager has earmarked Technology sector as a key theme for 2020 as the weightings has almost double in the second half of the financial year and key selection would be the Technology Select sector SPDR Fund (XLK US) and Fidelity NASDAQ Composite Tracking Stock ETF (ONEQ US). Both exchange traded funds has outperformed the S&P 500 index by a wide margin (XLK: +18%, ONEQ: +8%) over the past financial year.

In the wake of the massive meltdown in global capital markets, government and central banks around the world pump in massive stimulus packages: the US government rolled out US\$2 trillion fiscal stimulus package while the Federal Reserve acted swiftly this time round by slashing Fed Fund rate by 150 basis points to zero. The US central bank has also reiterated their

PHILLIP GLOBAL OPPORTUNITIES FUNDS

firm stand on unlimited quantitative easing to prevent the capital markets from a liquidity crunch crisis. With this in mind, this massive injection of liquidity into the financial system theoretically will only create two outcomes; rising asset prices and hyper-inflation but history does justify the first outcome but not the second one. In any case, the fund is well positioned to ride on the overwhelming optimism and near term expectations of rising asset prices. Hence, it is not uncommon to expect more volatility and uncertainty as the world braces for the negative impact from this contagion in the coming 18 to 24 months.

d) Description of the method used to calculate the global exposure of financial derivatives

The global exposure relating to derivative instruments is calculated using the commitment approach. The global exposure of the sub-fund is calculated as the sum of:

(i) the absolute value of the exposure of each individual financial derivative not involved in netting or hedging arrangements;

(ii) the absolute value of the net exposure of each individual financial derivative after netting or hedging arrangements; and

(iii) the sum of the values of cash collateral received pursuant to:

(a) the reduction of exposure to counterparties of OTC financial derivatives; and

(b) efficient portfolio management techniques relating to securities lending and repurchase transactions, and that are reinvested.

e) Amount and percentage of total fund size invested in other unit trusts, mutual funds and collective investment schemes as at 31 March 2020.

	S\$	%
Equity Fund	27,845,652	92.98

(ii) Expense ratios for the period ended 31 March 2020.

Not applicable.

(iii) Turnover ratios for the period ended 31 March 2020

Not applicable

n) **Soft dollar arrangements**

The Manager will comply with applicable regulatory and industry standards on soft-dollars. The soft-dollar commissions which the Manager may receive include research and advisory services, economic and political analyses, portfolio analyses including valuation and performance measurements, market analyses, data and quotation services, computer hardware and software or any other information facilities to the extent that they are used to support the investment decision making process, the giving of advice, or the conduct of research or analysis and custodial service in relation to the investments managed for clients. The soft dollar credits utilised are not allocated on a specific client basis. The brokers also execute trades for other funds managed by the Manager.

The Manager does not accept or enter into soft dollar commissions or arrangements unless such soft-dollar commissions or arrangements would, in the opinion of the Manager, assist the Manager in its management of clients' funds, provided that the Manager shall ensure at all times that transactions are executed on the best available terms taking into account the relevant market at the time for transactions of the kind and size concerned, and that no unnecessary trades are entered into in order to qualify for such soft-dollar commissions or arrangements.

The Manager does not, and is not entitled to, retain cash rebates for its own account in respect of rebates earned when transacting in securities for account of clients' funds.

During the year, soft dollar services received from each broker were investment research and publications, data and quotation services. Soft dollar services were received from the Manager's panel of brokers which executed transactions for the Fund and other funds managed by the Manager.

Report of the Trustee

The Trustee is under a duty to take into custody and hold the assets of Phillip Global Opportunities Funds in trust for the unitholders. In accordance with the Securities and Futures Act (Chapter 289), its subsidiary legislation and the Code on Collective Investment Schemes, the Trustee shall monitor the activities of the Manager for compliance with the limitations imposed on the investment and borrowing powers as set out in the Trust Deed in each annual accounting period and report thereon to unitholders in an annual report.

To the best knowledge of the Trustee, the Manager has, in all material respects, managed Phillip Global Opportunities Funds during the period covered by these financial statements, set out on pages FS1 to FS16, in accordance with the limitations imposed on the investment and borrowing powers set out in the Trust Deed.

Statement by the Manager

In the opinion of the directors of Phillip Capital Management (S) Ltd, the accompanying financial statements set out on pages FS1 to FS16, comprising the Statement of Total Return, Statement of Financial Position, Statement of Movements of Unitholders' Funds, Statement of Portfolio and Notes to the Financial Statements are drawn up so as to present fairly, in all material respects, the financial position and portfolio holdings of Phillip Global Opportunities Funds as at 31 March 2020, and the financial performance and movement in unitholders' funds for the year then ended in accordance with the recommendations of Statement of Recommended Accounting Practice 7 "Reporting Framework for Unit Trusts" issued by the Institute of Singapore Chartered Accountants. At the date of this statement, there are reasonable grounds to believe that Phillip Global Opportunities Funds will be able to meet its financial obligations as and when they materialise.

Independent auditors' report

Unitholders
Phillip Global Opportunities Funds
(Constituted under a Trust Deed in the Republic of Singapore)

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Phillip Global Opportunities Funds ("the Fund"), which comprise the Statements of Financial Position and Statements of Portfolio as at 31 March 2020, the Statements of Total Return and Statement of Movement of Unitholders' Funds for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages FS1 to FS16.

In our opinion, the accompanying financial statements are properly drawn up in accordance with the recommendations of Statement of Recommended Accounting Practice 7 "Reporting Framework for Unit Trusts" issued by the Institute of Singapore Chartered Accountants so as to present fairly, in all material respects, the financial position and portfolio holdings of the Fund as at 31 March 2020 and the financial performance and movements in unitholders' funds for the year ended on that date.

Basis for opinion

We conducted our audit in accordance with Singapore Standards on Auditing ("SSAs"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements*' section of our report. We are independent of the Fund in accordance with the *Accounting and Corporate Regulatory Authority Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities* ("ACRA Code") together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

Phillip Capital Management (S) Ltd, the Manager of the Fund (the "Manager") is responsible for the other information contained in the annual report. Other information is defined as all information in the annual report other than the financial statements and our auditors' report thereon.

We have obtained all other information prior to the date of this auditors' report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

KPMG LLP
16 Raffles Quay #22-00
Hong Leong Building
Singapore 048581

Telephone +65 6213 3388
Fax +65 6225 0984
Internet www.kpmg.com.sg

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Manager for the financial statements

The Manager is responsible for the preparation and fair representation of these financial statements in accordance with the recommendations of the Statement of Recommended Accounting Practice 7 "Reporting Framework for Unit Trusts" issued by the Institute of Singapore Chartered Accountants, and for such internal controls as the Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to terminate the Fund or to cease the Fund's operations, or has no realistic alternative but to do so.

The Manager's responsibilities include overseeing the Fund's financial reporting process.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal controls.

KPMG LLP
16 Raffles Quay #22-00
Hong Leong Building
Singapore 048581

Telephone +65 6213 3388
Fax +65 6225 0984
Internet www.kpmg.com.sg

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.
- Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit.

Notes to the Financial Statements

These notes form an integral part of the financial statements.

1. Domicile and activities

Phillip Global Opportunities Funds (“the Fund”) is an open ended umbrella unit trust constituted pursuant to a Trust Deed dated 26 May 2011 together with its Supplemental Deeds thereon (hereafter referred to as the “Trust Deed”) between Phillip Capital Management (S) Ltd (the “Manager”) and HSBC Institutional Trust Services (Singapore) Limited (the “Trustee”). The Trust Deed is governed by and construed in accordance with the laws of the Republic of Singapore.

The Fund comprises one sub-fund, Global Opportunities Fund (the “Sub-Fund”), which was launched on 13 June 2011.

The investment objective of the Sub-Fund is to aim to achieve medium to long term capital appreciation. The Sub-Fund will invest primarily in collective investment schemes including Exchange Traded Funds (“ETFs”) and Real Estate Investment Trusts (“REITs”). The Sub-Fund may only invest in REITs which are constituted in Singapore and such investment into REITs are capped at 20% of the net asset value of the Sub-Fund. The Sub-Fund may also invest into business trusts and individual securities (including equities and bonds) in accordance with the Sub-Fund’s investment objective.

2. Significant accounting policies

2.1 *Basis of financial statements preparation*

The financial statements, expressed in Singapore Dollars, have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Accounting Practice 7 “Reporting Framework for Investment Funds” revised and issued by the Institute of Singapore Chartered Accountants.

The adoption of the Revised RAP 7 did not result in substantial changes to the accounting policies of the Trust and had no material effect on the amounts reported for current or prior financial years.

For the purposes of preparation of these financial statements, the basis used for calculating the expense ratio and turnover ratio are in accordance with the guidelines issued by the Investment Management Association of Singapore (“IMAS”) and the Code on Collective Investment Schemes under the Securities and Futures Act (Cap 289) (“Code”) respectively.

2.2 *Basis of valuation of investments*

Quoted investments are stated at fair value based on the bid prices at the reporting date. Unrealised gains/losses on investments are represented by the difference between the fair value and the carrying value of investments and are recognised in the Statement of Total Return. Realised gains and losses upon disposal of investments are computed on the basis of the difference between the carrying value and the selling price of investments on trade date and are taken to the Statement of Total Return.

2.3 *Financial derivatives*

Derivatives are recognised initially at fair value; attributable transaction costs are recognised in the Statement of Total Return when incurred. Subsequent to initial recognition, derivatives are measured at fair value, and changes in fair value therein are recognised in the Statement of Total Return.

2.4 *Recognition of income*

Dividend income is recognised when declared and is stated gross of tax credits.

Interest income is recognised as it accrues in the Statement of Total Return using the effective interest method.

2.5 *Foreign currency translation*

Transactions in foreign currencies are translated at the exchange rate at the date of transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated at exchange rates at the reporting date. All exchange differences are recognised in the Statement of Total Return.

2.6 *Income tax expense*

The Sub-Fund is a designated unit trust under the Singapore Income Tax Act (Chapter 134). As a result, the following sources of income are not subjected to Singapore tax at the Sub-Fund level:

- (i) gains or profits derived from Singapore or elsewhere from the disposal of securities;
- (ii) interest (other than interest for which Singapore tax has been withheld); and
- (iii) dividends derived from outside Singapore and received in Singapore.

2.7 *Cash and cash equivalents*

Cash and cash equivalents comprise bank balances and amounts held with brokers. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

2.8 *Net assets attributable to unitholders*

Net assets attributable to unitholders are classified as equity.

3. Receivables

	Global Opportunities Fund	
	2020	2019
	S\$	S\$
Receivable from unitholders for creation of units	823,138	94,962
Dividends receivable	1,791	2,871
Interest receivable	1	1
Other receivable	13,390	4,625
	838,320	102,459

4. Cash and cash equivalents

	Global Opportunities Fund	
	2020	2019
	S\$	S\$
Bank balances	2,576,388	1,837,661
Amounts held with broker	366,612	47,751
	<u>2,943,000</u>	<u>1,885,412</u>

The bank balances are placed with a financial institution related to the Trustee.

5. Payables

	Global Opportunities Fund	
	2020	2019
	S\$	S\$
Payable to unitholders for cancellation of units	677,059	65,459
Accrued operating expenses	110,706	95,701
	<u>787,765</u>	<u>161,160</u>

6. Units in issue

During the year, the number of shares issued, redeemed and outstanding were as follows:

	Global Opportunities Fund	
	2020	2019
Units at beginning of the year	18,027,341	10,836,540
Units created	18,289,987	14,310,619
Units cancelled	(9,196,731)	(7,119,818)
Units at end of the year	<u>27,120,597</u>	<u>18,027,341</u>
Net assets attributable to unitholders – S\$	<u>29,947,939</u>	<u>21,057,868</u>
Net asset value per unit – S\$	<u>1.1043</u>	<u>1.1681</u>

For subscriptions and redemption and for various fee calculations, investments are stated at the last traded price on the valuation day for the purpose of determining net asset value per unit while for reporting purpose, the investments are valued at the relevant bid market prices as at the reporting date.

The effect of last traded price in the net assets attributable to unitholders is as follows:

	Global Opportunities Fund	
	2020	2019
	S\$	S\$
Net assets attributable to unitholders per financial statements	1.1043	1.1681
Effect of adopting last traded price	0.0017	0.0005
Effect for movement in the net asset value between the last dealing date and the end of the reporting period	(0.0003)	0.0002
Net assets attributable to unitholders for issuing/redeeming	1.1057	1.1688

7. Income tax

	Global Opportunities Fund	
	2020	2019
	S\$	S\$
Overseas income tax	109,974	63,599

The overseas income tax charge relates to withholding tax suffered on receipt of distributions from overseas investments.

8. Financial risk management

The Sub-Fund's activities expose it to a variety of market risks (including price risk, interest rate risk and currency risk), liquidity risk and credit risk. The Sub-Fund's overall risk management programme seeks to minimise potential adverse effects on the Sub-Fund's financial performance. The Sub-Fund may use financial derivative instruments, subject to the terms of the Trust Deed to moderate certain risk exposures. Specific guidelines on exposures to individual securities and certain industries are in place for the Sub-Fund at any time as part of the overall financial risk management to reduce the Sub-Fund's risk exposures.

a) Market risks

Market risk is the risk of potential adverse change to the value of financial instruments because of changes in market conditions such as interest rate movements and volatility in securities' prices. The Manager manages the Sub-Fund's exposure to market risk through the use of risk management strategies and various analytical monitoring techniques.

i. Price risk

Price risk is the risk that the fair values of equities or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk).

The investments of the Sub-Fund are subject to normal market fluctuations and the risks inherent in investing in securities markets and there can be no assurance that appreciation will occur. It is the policy of the Manager to maintain a diversified portfolio of investments so as to minimise the risk. The Manager's preferred strategy is to hold investments for the medium to long term. The Manager is therefore not concerned about the short-term price volatility with respect to its investments provided that the underlying business, economic and management characteristics of its investments remain favourable.

A 10% increase in the market prices of investments at the reporting date would increase the fair value of investments by the following amount:

	Global Opportunities Fund	
	2020	2019
	S\$	S\$
Equity securities	2,784,565	1,923,116
	2,784,565	1,923,116

ii. Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates.

The Sub-Fund is not subject to significant risk of fluctuations in market interest rates as the Sub-Fund's financial assets and liabilities are largely non-interest bearing other than the cash balances.

iii. Currency risk

The Sub-Fund is denominated in Singapore Dollars. The Sub-Fund invests in underlying securities which are denominated in foreign currencies where fluctuations in the relevant exchange rates may have an impact on the income and value of the Sub-Fund. The Manager may seek to minimise exposure to foreign currency fluctuation to the extent practicable.

As at 31 March 2020 and 2019, the concentration of the Sub-Fund's investments is set out in the Statement of Portfolio.

Investments denominated in currencies other than the Sub-Fund's functional currency comprise the following:

	Global Opportunities Fund	
	2020	2019
	S\$	S\$
Hong Kong Dollar	2,029,302	1,736,276
US Dollar	20,344,162	15,489,009
	20,344,162	15,489,009

Cash and cash equivalents denominated in currencies other than the Sub-Fund's functional currency comprise the following:

	Global Opportunities Fund	
	2020	2019
	S\$	S\$
US Dollar	489,308	1,355
	489,308	1,355

The Sub-Fund's monetary assets/liabilities are measured for their sensitivity to exchange rate movements based on the balance of the monetary assets/liabilities, forecasted exchange rate movements and the net asset value of the Sub-Fund.

As at 31 March 2020 and 2019, with respect to the monetary assets and monetary liabilities of the Sub-Fund, had the Singapore Dollar increased/decreased by 10% against foreign currencies, with all other variables remaining constant, the decrease/increase in net assets attributable to unitholders would be as follows:

Global Opportunities Fund

**Increase/(Decrease) in net
assets attributable to
unitholders**

	2020	2019
	S\$	S\$
Hong Kong Dollar	202,930	173,628
US Dollar	2,083,347	1,549,036
	2,083,347	1,549,036

b) *Liquidity risk*

The Sub-Fund is exposed to daily redemption of units in the Sub-Fund. Therefore the majority of its assets are invested in investments that are traded in an active market and can be readily disposed of.

c) *Credit risk*

Credit risk is the risk that a counterparty will fail to perform contractual obligations, either in whole or in part, under a contract.

The Sub-Fund is exposed to counterparty credit risk on trading derivative products, cash and bank balances and other receivable balances.

All transactions in listed securities are settled/paid upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

The Sub-Fund may also enter into derivative contracts to manage exposures to currency risk and price risk, including foreign exchange forward contracts and options. Hence, the Sub-Fund is also exposed to the risk that amounts held with counterparties for derivative contracts may not be recoverable in the event of any default by the parties concerned.

d) *Fair value estimation*

Except for investments which are measured at fair value, at 31 March 2020 and 2019, the fair values of the other assets and liabilities approximate their carrying values on the Statement of Financial Position due to their short period to maturity.

The fair value of the investments traded in active markets (such as publicly traded securities) are based on quoted market prices at the close of trading on the reporting date. The quoted market price used for financial assets held by the Sub-Fund is the current bid price; the appropriate quoted market price for financial liabilities is the current asking price. When the Sub-Fund holds derivatives with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk positions and applies this bid or asking price to the net open position, as appropriate.

The Sub-Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The following table analyses within the fair value hierarchy the Sub-Fund's financial assets and liabilities (by class) measured at fair value at 31 March 2020 and 2019:

Global Opportunities Fund	Level 1 S\$	Level 2 S\$	Level 3 S\$	Total S\$
2020				
Assets				
Equity Fund	27,845,652	-	-	27,845,652
2019				
Assets				
Equity Fund	19,231,157	-	-	19,231,157

9. Related parties

In the normal course of business of the Sub-Fund, management fees and trustee fees have been paid or are payable to the Manager and the Trustee respectively as noted in the Statement of Total Return.

In addition, the bank holding company and related parties of the Trustee have also provided custodian, banking, foreign exchange, fund administration and brokerage services to the Sub-Fund in the normal course of business at terms agreed between the parties and within the provisions of the Trust Deed.

The Manager may also use the services of related parties to carry out transactions involving the purchase and sale of securities.

Other than as disclosed elsewhere in the financial statements, the following significant transactions took place between the Sub-Fund and its related parties during the year:

	Note	Global Opportunities Fund	
		2020 S\$	2019 S\$
Interest income received from a related party of the Trustee		94	34
Bank balances held with a related party of the Trustee	4	2,576,388	1,837,661

10. Financial ratios

	Global Opportunities Fund	
	2020	2019
Expense ratio		
Total operating expenses	S\$ 461,945	355,512
Average daily net asset value	S\$ 23,372,080	16,107,130
Prorated expense ratio of the underlying funds ^(Note 1)	%	0.23
Expense ratio ^(Note 1)	%	2.20
	<hr/>	<hr/>
	2.20	2.40
Turnover ratio		
Lower of total value of purchases or sales	S\$ 33,701,371	19,131,806
Average daily net asset value	S\$ 23,372,080	16,107,130
Turnover ratio ^(Note 2)	%	144.20
	<hr/>	<hr/>
	144.20	118.78

Note 1: The expense ratio has been computed based on the guidelines laid down by the IMAS.

The calculation of the expense ratio is based on total operating expenses divided by average net asset value for the year.

The total operating expenses do not include (where applicable) brokerage and other transaction costs, performance fee, interest expense, distribution paid out to unitholders, foreign exchange gains/losses, front or back end loads arising from the purchase or sale of other funds and tax deducted at source or arising out of income received. The Sub-Fund does not pay any performance fee. The average net asset value is based on the daily balances.

In the case of funds of funds, which are generally defined as funds with more than 50% of their total assets in other underlying funds, a summarised expense ratio of the target funds and the fund of funds is calculated as of the closing date of the financial year. This corresponds to the sum of:

- The prorated ratio of the individual target funds, weighted according to the share they represent in the assets of the fund of funds as of the closing date, and the
- Expense ratio of the fund of funds minus any rebates of management fees and commissions received from the target funds during the reporting period.

Note 2: The turnover ratio is calculated in accordance with the formula stated in the Code. The calculation of the turnover ratio is based on the total value of purchases (or sales) of the underlying investments divided by the weighted average daily net asset value. The total value of purchase (or sales) do not include brokerage and other transaction costs.

11 Impact on Covid-19 pandemic

In March 2020, the spread of the novel coronavirus (COVID-19) has created a high level of uncertainty to the near-term global economic prospects and volatility in the global capital markets. This has caused the NAV per unit of the Sub-Fund as at 31 March 2020 to fall by

approximately 9% as compared to 29 February 2020. Similar decrease as in the index was observed.

Subsequently on 29 May 2020, the NAV per unit of the Sub-Fund increased by 12% as compared to 31 March 2020, driven by the robust performance of the underlying global equity market, recouping some of the losses it suffered in the first quarter. The Manager has been closely monitoring the impact to the Fund.

Important Information

Global Opportunities Fund (the “Sub-Fund”) is a sub-fund of Phillip Global Opportunities Funds (the “Fund”), an open ended umbrella unit trust authorised under the Securities and Futures Act, Chapter 289, by the Monetary Authority of Singapore

This document is published by Phillip Capital Management (S) Ltd, the manager of the Fund (the “Manager”), for information only and it does not constitute a prospectus nor form part of any offer or invitation to subscribe for or to purchase, or solicitation of any offer to subscribe for or to purchase, any units in the Sub-Fund. All applications for units in the Sub-Fund must be made on the application forms accompanying the latest prospectus of the Fund (the “Prospectus”).

The information and opinions contained in this document have been obtained from public sources which the Manager believes to be reliable and accurate. However, no representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information and it should not be relied upon as such. Opinions included herein constitute the judgement of the Manager at the time specified and may be subject to change without notice, they are not to be relied upon as authoritative or taken in substitution for the exercise of judgment by any recipient and are not intended to provide the sole basis of evaluation of any investment. Neither the Manager nor the Fund, nor any of their respective associates, directors, officers or employees, accepts any liability whatsoever for any loss arising directly or indirectly from any use of this document or any information contained herein.

Given the economic and market risks, there can be no assurance that the Sub-Fund will achieve its investment objectives. Investments in the Sub-Fund are not deposits or other obligations of, or guaranteed, or insured by the Manager or the distributors or their affiliates and are subject to investment risks, including the possible loss of the full principal amount invested. Returns may be affected by, among other things, the investment strategies or objectives of the Sub-Fund and material market and economic conditions. The value of the units and the income from them can fall as well as rise. Past performance is not necessarily indicative of the future performance of the Sub-Fund.

This document should not be taken as a recommendation to buy or sell since it does not take into account the specific investment objectives, financial situation and the particular needs of any particular recipient of this document. Investors should seek advice from a financial advisor before purchasing units in the Sub-Fund. In any case, investors should read the Prospectus and consider the risks as well as suitability of the Sub-Fund before deciding whether to subscribe for units in the Sub-Fund. Copies of the Prospectus are available and may be obtained from the Manager.
