The calculation of the expense ratio is based on total operating expenses divided by the average net asset value for the period. The total operating expenses do not include (where applicable) brokerage and other transaction costs, performance fees, interest expenses, distributions paid out to unitholders, foreign exchange gains/losses, front or back end loads arising from the purchase or sale of other funds and tax deducted at source or arising out of income received. The Sub-Funds do not pay performance fee. The average net asset value is based on the daily balances.

<sup>2</sup> The portfolio turnover ratio is calculated in accordance with the formula stated in the Code. The calculation of the portfolio turnover ratio is based on the total value of purchases (or sales) of the underlying investments divided by the weighted average daily net asset value. Total value of purchases (or sales) does not include brokerage and other transaction costs. The total value of bonds matured during the period is not included in the computation of portfolio turnover ratio.
