PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

- The Product is only suitable for investors who:
 - are sophisticated trading-oriented investors;
 - are able to constantly monitor the performance of their holding on a daily basis, and are in a financial position to assume the risks in futures investments;
 - wish to gain leveraged exposure to the Index; and
 - are prepared to lose the entire value of their investments
- The Product is designed to be used as a short term trading tool for market timing or hedging purposes and are not appropriate for long term (longer than one day) investment.

Further Information
Refer to Section A of Appendix I to the Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a Product that provides investment results that, before fees and expenses, closely correspond to twice (2x) the daily performance of the Index.

Refer to <https://www.msci.com/index-methodology/> for information

¹ The Prospectus is available for collection at the Manager’s registered office at 250 North Bridge Road, #06-00 Raffles City Tower, Singapore 179101, from Monday to Friday during normal business hours, or accessible at www.phillipfunds.com.

<ul style="list-style-type: none"> The Index is compiled and maintained by MSCI Inc. and is designed to measure the performance of the large and mid-cap segments of the Singapore market. The Index is reviewed quarterly — in February, May, August and November. During the May and November semi-annual index reviews, the Index is rebalanced and the large and mid capitalisation cutoff points are recalculated. Distributions, if any, will be determined by the Manager. To the extent that any distributions will be determined by the Manager, such distributions will be declared annually to investors in September of each year or at such other times as the Manager may determine. 	<p>on the value of the Index and the Index's construction methodology.</p>
Investment Strategy	
<ul style="list-style-type: none"> The Manager employs a combination of futures-based synthetic replication and direct investment into the underlying Index Securities. Futures-based synthetic replication will be carried out by investing directly in the SiMSCI Futures to obtain the required exposure to the Index. To the extent that certain SiMSCI Futures are held to expiration, they will be cash settled and there will be no physical delivery. The Manager will be investing directly into the underlying Index Securities in substantially the same weightings as reflected in the Index. The combined exposure (notional exposure to the SiMSCI Futures plus exposure to the underlying Index Securities) would be approximately 200% of the Net Asset Value of the Product. In entering into the SiMSCI Futures, the Manager anticipates that no more than 30% of the Net Asset Value of the Product from time to time will be placed in the futures margin account balance to support the Product's positions in SiMSCI Futures. Subject to the provisions of the Code, the Manager may also invest into unlisted securities (such as fixed income/money market funds) and fixed income/money market ETFs. Such unlisted securities and/or ETFs may include those managed by the Manager. The Product's total exposure to financial derivative instruments will not exceed 200% of its Net Asset Value (i) at the time of daily rebalancing of the Product; and (ii) between each daily rebalancing, unless due to market movements. For the calculation of global exposure, the commitment approach will be used. The Product will rebalance its position on a day when the SGX-ST and the SGX-DT are open for trading (i.e. a business day). On such days, the Product will seek to rebalance its portfolio at or near the close of trading of the T session on the SGX-DT, by increasing exposure in response to the Index's daily gains or reducing exposure in response to the Index's daily losses, so that its daily leveraged exposure ratio to the Index is consistent with the Product's investment objective. 	<p>Refer to Section B of Appendix I to the Prospectus setting out the description of the investment objective, approach and strategy of the Product.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Manager is Phillip Capital Management (S) Ltd. The Trustee and Registrar is HSBC Institutional Trust Services (Singapore) Limited. The Custodian is The Hongkong and Shanghai Banking Corporation Limited. 	<p>Refer to Paragraphs 8.1, 8.2, 8.5, 8.6 and 8.8 of the Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.</p>
KEY RISKS	

<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The price of Units and any income earned on the Units may go down as well as up, and you may not get back the amount you have invested in the Product. The risk factors below may cause you to lose some or all of your investment. However, these risk factors identified are not exhaustive and you should refer to the Prospectus for a fuller description of the risk factors.</p>	<p>Refer to Paragraphs 6 and 7 of, and Section H of Appendix I to, the Prospectus for further information on the risks of the Product.</p>
<p>Market and Credit Risks</p>	
<ul style="list-style-type: none"> • You are exposed to market risk. <ul style="list-style-type: none"> ○ The Net Asset Value of the Units will fluctuate with changes in the market value of the securities and/or Futures Contracts held by the Product. Investors in the Product are exposed to the same risks that investors who invest directly in the securities and/or Futures Contracts would face. 	
<p>Liquidity Risks</p>	
<ul style="list-style-type: none"> • Creation and Redemption through Participating Dealers. <ul style="list-style-type: none"> ○ Investors may generally not create or redeem Units directly with the Manager and in any event can only create or redeem Units through Participating Dealers if investors are clients of the relevant Participating Dealer (subject to such terms and conditions as the Participating Dealer may impose). The Participating Dealers are under no obligation to agree to do so on behalf of any investor and may impose terms and conditions in connection with such creation or redemption orders from investors. Each Participating Dealer may, in its absolute discretion, refuse to accept a creation order from an investor and can charge such fees as it may determine. 	<p>Refer to Paragraph 6.10 of the Prospectus for situations in which trading of Units may be suspended.</p>
<p>Product-Specific Risks</p>	
<ul style="list-style-type: none"> • You are exposed to long term holding risk. <ul style="list-style-type: none"> ○ The Product is not intended for holding longer than one day as the performance of the Product over a period longer than one day will very likely differ in amount and possibly direction from the leveraged performance of the Index over that same period (e.g. the loss may be more than twice the fall in the Index). • You are exposed to path dependency risk. <ul style="list-style-type: none"> ○ The Product should not be equated with seeking a leveraged position for periods longer than a day. Investors in the Product should note that the point-to-point accumulated performance of the historical daily leveraged performance of the Index over a certain period may not be twice the point-to-point performance of the Index over the same period of time due to the effect of “path dependency” and compounding of the daily returns of the Index. ○ Investors should exercise caution when holding the Product for longer than the rebalancing interval, i.e. one business day. The performance of the Product, when held overnight, may deviate from the leveraged performance of the Index. ○ Investors should note that due to the effect of “path dependency” and compounding of the daily returns of the Index, the performance of the Index multiplied by two (and as a result the performance of the Product before deduction of fees and expenses) for periods longer than a single day, especially in periods of market volatility which has a negative impact on the accumulative return of the Product, may not be twice the return of the Index and may be completely uncorrelated to the extent of change of the Index over the same period.
