

INVESTMENT OBJECTIVE & FOCUS

The investment objective of the Phillip Global Rising Yield Innovators Fund is to achieve sustainable income streams and long-term capital growth in dividend-yielding global stocks of stable, simple-to-understand, non-cyclical quality businesses who are resilient in economic downturns and generate sustainable rising yields over time.

The Sub-Fund seeks to achieve its investment objective by investing in global stocks with quality businesses who are resilient in economic downturns and generate sustainable longterm shareholders' returns. We combine top-down and bottom-up approaches in managing the Sub-Fund; the top-down approach tackles the asset and geographical allocation decisions while the bottom-up approach tackles vigorous quantitative and qualitative analysis to determine the absolute and relative attractiveness of the securities. The Sub-Fund may invest into other collective investment schemes ("CIS") and/or exchange traded funds ("ETFs"), including those managed by Phillip Capital Management, subject to applicable investment guidelines in the Code on Collective Investment Schemes.

We may use derivatives for hedging and efficient portfolio management purposes in the portfolio and such derivatives are not used to gear the overall portfolio.

Dividends are automatically reinvested into additional units at the net asset value per unit of the date of distribution. Special dividends may be paid out at the discretion of the Fund Manager.
