KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <ul style="list-style-type: none"> • The value of your investment may rise or fall, and the amount and frequency of distributions are at the sole discretion of the Managers and are not guaranteed. • These risk factors may cause you to lose some or all of your investment and your principal may be at risk. 	<p>Refer to Para 10 of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to market risk. Trading volumes in stock markets of certain countries included in the investment universe of the Fund can be significantly lower than on the world's leading stock markets and settlement and custody practices in such markets may not be comparable to those of the world's leading stock markets, which may result in fluctuations in the price of Units in the Fund. • You are exposed to economic, political and interest rates risk. Prices of securities may go up or come down in response to changes in economic conditions, political conditions, interest rates and the market's perception of securities which may in turn cause the price of Units in the Fund to rise or fall. • You are exposed to counterparty risk. The Fund may enter into transactions which will expose the Fund to the credit of its counterparty. In the event of a bankruptcy or insolvency of a counterparty, the Fund may experience delays in liquidating the position and significant losses, including declines in the value of its investment during the period in which the Fund seeks to enforce its rights, inability to realise any gains on its investment during such period and fees and expenses incurred in enforcing its rights.

Product-Specific Risks													
<ul style="list-style-type: none"> You are exposed to currency/foreign exchange risk. Investments by the Fund may be made in a variety of currencies, whereas the NAV of the Fund at any time will be computed in its base currency. Accordingly, the value of the Fund may be affected favourably or unfavourably by movements in currency exchange rates. The Managers reserve the discretion to determine if currency exposure should be hedged actively, passively or not at all, in the best interest of the Fund. You are exposed to derivatives risk. The Managers may invest in FDIs for the purposes of hedging and/or efficient portfolio management. The use of FDIs involves increased risk. The Fund's ability to use such instruments successfully depends on the Managers' ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Managers' predictions are wrong, or if the FDIs do not work as anticipated, the Fund could suffer greater losses than if the Fund had not used such FDIs. You are exposed to risks associated with securities lending and repurchase transactions. Securities lending and repurchase transactions involve counterparty/credit risk, liquidity risk, sufficiency of collateral risk, collateral investment risk, delivery risk and operational risk. <p>You should be aware that your investment in the Fund may be exposed to other risks of an exceptional nature from time to time.</p>
